DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed over the prior art of record in view of the combination of arguments filed 07/22/2008 and filed 03/06/2009.
2. The following is an examiner's statement of reasons for allowance: The claims in the application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed liquid crystal sealing agent, most particularly one which includes a thermoplastic polymer having a softening temperature by the ring and ball method of 50 to 120.degrees.C. and lower than the curing temperature.
3. The closest prior art of record is Kunihiro et al. (JP 05-295087), which discloses the general sealing agent absent the thermoplastic polymer component. Henton (US 4,778,851) and Eldin (US 6,111,015) disclose the use of a thermoplastic polymer component as a toughening additive and were relied upon as the closest prior art for the thermoplastic polymer component to be added to Kunihiro.
4. Regarding claim 1, as stated above Kunihiro fails to teach the thermoplastic polymer component. Henton actually discloses the component, but actually calls for maintaining constant morphology during curing which would mean the component would not be softened (i.e. softening temperature higher than curing temperature). This is in contradiction to the claims. Eldin is drawn to rubber tougheners and discloses that such can be solid or liquid in initial state; however, given the teachings of Henton in regard to morphology one would actually have been directed away from liquid

tougheners. In addition the softening temperature in the range of at least 52-113.degrees.C appears to have an improved combination of viscosity stability, display characteristics and bond strength. It would therefore not have been an obvious choice to use such softening values in view of the teachings of Henton, which teach away to such a use, and alternatively or additionally in view of the fact that the range appears to contain improved characteristics.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
